Korea's initial domestic lift truck market was an open-import enterprise. In the 1960's, Korea Machinery Co. Ltd. began to import assembled lift trucks as part of a national equipment expansion venture. Early sales of this manufacturing equipment focused on large business communities, the armed forces and on state-run companies. This eventually led to a unification with Daewoo Heavy Industries Ltd. In 1976, the Forklift Division commenced trade operations throughout Korea to overhaul and sell this heavy equipment. By 1978, a forklift production plant was successfully completed. Continuous technical instruction grew to become the new focus for improving quality and product development.

Daewoo began the first domestic lift truck business in 1967, and quickly gained a massive 90% share in the Korean Materials Handling market. By the 1980's, Daewoo's sophisticated technological enhancements combined with sales success placed them in a situation of considerable expansion of their lift truck business.

In 1981, Caterpillar Industrial Inc. of the United States, proposed a cooperative venture project to counter act competitive pressures in the US materials handling industry. This plan radically expanded Daewoo's forklift sales. Construction was completed in 1984 to facilitate a new plant which helped set up the business for the fabrication of high added-value goods suited for export. In 1993, the corporation had a global sales system and started exporting models they had established through in-house expertise, as an independent product. Certifications were then acquired from CE of Europe, UL of the United States and ISO 14001 and ISO 9001, securing expansion possibilities into overseas marketplaces.
